

Google is so powerful that it "hides" other search systems from us. We just don't know the existence of most of them.

Meanwhile, there are still a huge number of excellent searchers in the world who specialize in books, science, other smart information.

Keep a list of sites you never heard of.

[www.refseek.com](http://www.refseek.com) - Academic Resource Search. More than a billion sources: encyclopedia, monographies, magazines.

[www.worldcat.org](http://www.worldcat.org) - a search for the contents of 20 thousand worldwide libraries. Find out where lies the nearest rare book you need.

<https://link.springer.com> - access to more than 10 million scientific documents: books, articles, research protocols.

[www.bioline.org.br](http://www.bioline.org.br) is a library of scientific bioscience journals published in developing countries.

<http://repec.org> - volunteers from 102 countries have collected almost 4 million publications on economics and related science.
